How to Measure

Water opening, edge to edge **Finished spa cover dimensions**

Please confirm if dimensions noted on order are from waterline to waterline (the water opening of the spa) or from edge to edge (the dimensions of the new spa cover that will fit over the spa). For in-ground spas, cover requires 4" of overlap onto the surrounding deck on all sides. If you are providing the water opening measurements, 8" will be added to the A and B dimensions
